

Literature Review

By Ian Thut for Sing to Say Inc.

April, 2019

Index

Area of Inquiry I: The autistic brain and the benefits—and its ability—to process music

Area of Inquiry II: Music’s emotional connection with children can provide pathways to learning

Area of Inquiry III: Fun, entertaining curriculum that engages, improves student outcomes with neuro-typical students and students with autism

Area of Inquiry IV: Musical rhythm’s relation to the autistic and neuro-typical brains

Area of Inquiry V: Digital devices preferred as learning system for communication instruction

Area of Inquiry I: The autistic brain and the benefits – and its ability – to process music

Lai, Grace. “Functional and Structural Neurocircuitry of Language and Music Systems in Autism Spectrum Disorder.” PhD diss., Columbia University, 2011. Accessed December 28, 2018. <https://search-proquest-com.ezproxy.lib.ryerson.ca/docview/863434885?pq-origsite=summon>
